why is d3s135 covered over  
 1.83

**Conclusion:**

Combined Paternity Index: 123,330,627 to 1 Probability of Paternity: 99.99% (Prior Probability = 0.5)

The alleged father, JAVIER ANDRADE, cannot be excluded as the biological father of the child, OLIVIA MARRUJO, since they share genetic markers. Using the above systems, the probability of paternity is 99.99%, as compared to an untested, unrelated man of the Mexican-American population.

I, the undersigned, upon being duly sworn on oath, do depose and state that I read the foregoing report on the analysis of specimens from the above named individuals, signed by myself, and under penalties for perjury it is my belief that the facts and results therein are true and correct.
